VERY IMPORTANT PLYWOODS

PRIME

www.groupe-thebault.com

High quality control

By integrating the surface pre-finishing of the plywood panels in its industrial process, the Thebault Group is willing to offer high quality controlled plywood at all

stages of the manufacturing process.

This is the major reason for which the Group has decided to invest in a painting station of 2000 m² located at Magné, using the latest technology.

ECO-CERTIFICATIONS

Poplar Plywood	Okoume Plywood
PEFC™ / EUTR	FSC® / EUTR

PEFC™ certifications for wood of European origin or FSC® for those sourced in West Africa apply to the plywood products manufactured by the THEBAULT Group. Both certifications guarantee the use of wood sourced from sustainable managed forests.

The THEBAULT Group fully complies with the European Timber Regulation of the EU (EUTR) thus contributing to guarantee the traceability of the wood and its by-products.

MARKS & LABELS

Quality mark	CE Marking	Information on the emission level of volatile substances within the indoor air, showing a risk of toxicity in case of inhalation, based on a scale going from A (very low emissions) to C (high emissions). Mounting scenarios
NF Extérieur CTB-X	CE Structure	

PRIME OVERLAY

OKOUME

& POPLAR

PRIME

The **PRIME** overlay applied to both **Okoumé** and **Poplar plywood** is a coating made from a **white primer applied by curtain application**.

TEBOPRIME and TEBOPLUS PRIME are white semi-finished pre-painted plywood products. They are respectively intended for use in outdoor and humid or indoor applications.

The specific characteristics of the primer used at manufacturing stage by the THEBAULT Group generates an excellent base to a variety of final coat versions.

VIP PRODUCTS

- **TEBOPRIME** : Okoume core plywood 120 / 120 μ
- **TEBOPLUS PRIME** : Poplar core plywood 80 / 80 μ

CHARACTERISTICS

- Pre- painted overlay at manufacturing stage
- Available in 2 wood species : Okoume and Poplar
- Bonding class IAW EN 314-2 : Class 3
- Service classes IAW EN 636 : Class 3 exterior conditions (Okoumé), Class 2 humid conditions (Poplar)
